DOSE

DICTIONARY OF SUBSTANCES AND THEIR EFFECTS

Dictionary of Substances and their Effects (DOSE) is a new, unique, user-friendly guide to 5,000 chemicals and the impact they have on life forms and the environment across the globe.

Compiled with the aid of official lists from the EC, UK, USA and Canada, **DOSE** is being published in seven alphabetical volumes, which will be completed in 1994. Each volume contains an index of chemical names, CAS registry numbers and molecular formulae, as well as a glossary of biological organisms. A separate volume containing cumulative indices of all volumes will be published after Volume 7.

DOSE LISTS EACH CHEMICAL'S:

- IDENTIFIERS
- OCCUPATIONAL EXPOSURE
- STATUS IN LEGISLATION WORLDWIDE
- EFFECTS ON SEWAGE WORKS PROCESSES
- USES
- ECOTOXICITY
- MAMMALIAN TOXICITY
- PHYSICAL PROPERTIES

DOSE enables the user to make rapid hazard assessments of chemicals, facilitating risk assessment and further action. Such a store of information is of critical importance to scientists, environmentalists, industry professionals, regulators and researchers – indeed anyone affected by or concerned about chemicals and their potential effects on the environment the world over.
