

Biomedical-Bioscience Information

Online on STN International®

Do you need current and retrospective information about bioscience and biomedicine? Search the databases on STN International! You'll find comprehensive information on a wide variety of biomedical-bioscience topics, including:

- biology
- bioengineering
- pharmaceutical science
- biochemistry
- environmental health science
- agricultural science
- food technology
- experimental and clinical medicine
- dentistry
- veterinary medicine

Through the biomedical-bioscience family of files on STN, find out about testing of anti-AIDS drugs, sequence correlation of interleukins, environmental effects of acid rain, genetically engineered organisms, and much more.

MEDLINE now available on STN!

The MEDLINE file on STN International is a major source of medical information, containing approximately 5 million records drawn from over 3,000 international journals. With MEDLINE on STN, you can identify substances in the REGISTRY file and transfer your answers into MEDLINE for related citations. MEDLINE on STN includes a convenient, online thesaurus for easy selection of search terms.

Search MEDLINE in conjunction with other STN files, including PHAR, the file of pharmaceutical product information; BIOSIS Previews/RN, a source of literature on all biological and biomedical topics; the CABA file of agriculture and related information; and FSTA, the file of information on food science and technology.

Try online searching for biomedical-bioscience information with STN. For more information, mail or fax the coupon at right.
