

## CONTENTS

*JCFTBS* 79(4), 491–644 (1983) CHEMICAL PHYSICS ISSN 0300–9238

	<i>page</i>
Proton and Carbon-13 Nuclear Magnetic Resonance Spectra and INDO Study of Serotonine, Tryptamine and L-Tryptophan S. BIAGINI, A. LAI, M. MONDUZZI and G. SABA	491–496
Positive Temperature Coefficient of the Iodine Quadrupole Resonance Frequency in Ammonium Tri-iodide due to Reorientation of the Ammonium Ion Y. YOSHIOKA, N. NAKAMURA and H. CHIHARA	497–504
Luminescence of $\text{Eu}^{3+}$ and $\text{Tb}^{3+}$ Ions Adsorbed on Hydrated Layer-lattice Silicate Surfaces F. BERGAYA and H. VAN DAMME	505–518
Excitation Wavenumber Dependence of the Symmetric Chain-stretching Mode of Linear-chain Mixed-valence Platinum Complexes R. J. H. CLARK and M. KURMOO	519–527
Molecular Quadrupole Moment and Effective-quadrupole-centre of Fluorobenzene G. R. DENNIS, I. R. GENTLE and G. L. D. RITCHIE	529–538
Field-gradient-induced Birefringence in Dilute Solutions of Furan, Thiophen and Selenophen in Cyclohexane G. R. DENNIS, I. R. GENTLE, G. L. D. RITCHIE and C. G. ANDRIEU	539–545
Cooperative Behaviour in Liquids G. J. EVANS	547–558
Intramolecular Relaxation Processes of Benzophenone and Related Molecules in Glassy Media M. A. DESANDO, D. L. GOURLAY and S. WALKER	559–570
Transient Diffusion Kinetics in Media Exhibiting Axial Variation of Diffusion Properties. Part 1.—Sorption Kinetics Z. J. GRZYWNA and J. H. PETROPOULOS	571–584
Transient Diffusion Kinetics in Media Exhibiting Axial Variation of Diffusion Properties. Part 2.—Permeation Kinetics Z. J. GRZYWNA and J. H. PETROPOULOS	585–597
Electronic Spectra of Biphenylene and Diazabiphenylenes H. YAMAGUCHI, M. ATA, J. F. W. MCOMIE, J. W. BARTON and H. BAUMANN	599–609
Viscoelastic Shear Thinning of Liquids. A Molecular-dynamics Study D. M. HEYES, C. J. MONTROSE and T. A. LITOVITZ	611–635
Corrigendum to Reactive Scattering of a Supersonic Oxygen-atom Beam: $\text{O} + \text{C}_2\text{H}_4, \text{C}_2\text{H}_2$ A. R. CLEMO, G. L. DUNCAN and R. GRICE	637
Reviews of Books	639–644

## INSTRUCTIONS TO AUTHORS

**General Policy**—The *Journal of the Chemical Society* is a medium for reporting selected original and significant contributions to new chemical knowledge. Articles which do not advance knowledge (e.g. reviews) will not normally be considered for publication in the Journal. Although authors need not be members of the Royal Society of Chemistry it is hoped that they will be.

**All contributions are judged in the criteria of (i) originality and quality of scientific content and (ii) appropriateness of the length to content of new science. Thus, papers reporting results which would be routinely predicted or result from application of standard procedures or techniques are unlikely to prove acceptable in the absence of other attributes which themselves make publication desirable.**

Although short articles are acceptable, the Society strongly discourages fragmentation of a substantial body of work into a number of short publications. Unnecessary fragmentation will be a valid reason for rejection of manuscripts.

The *Journal* is published in five Transactions: Dalton: Inorganic;

Perkin I: Organic and Bio-organic; Faraday I: Physical;

Perkin II: Physical Organic; Faraday II: Chemical Physics

Authors are requested to indicate, at the time they submit a typescript, the Transactions for which it is intended. Should this seem unsuitable, the Editor will inform the author.

**Conditions Governing Acceptance**—Contributions which have appeared or have been accepted for publication with essentially the same content in another journal or which incorporate freely available printed work will not be published in the *Journal* except by permission of the Council. This restriction does not apply to results previously published in materially abbreviated form, as a paper presented at a symposium, as a communication to *Chemical Communications*, as a letter to the Editor of other periodicals, or as a patent.

Contributions are accepted by the Society on the understanding that the authors (a) have obtained any necessary authority for publication, and (b) will, if requested, surrender their copyright to the Society. Authors are solely responsible for the factual accuracy of their contributions.

Since the Society reserves the right to retain all typescripts sent to it, authors are advised to keep copies. When contributions have been submitted for publication the authors are not at liberty, save by permission of the Society, to withdraw or delay them or to publish them elsewhere until after publication by the Society.\*

**Submission of Articles**—Typescripts should be addressed to: The Director of Publications, The Royal Society of Chemistry, Burlington House, London W1V 0BN. Three copies of the typescript (a top copy and two good quality carbon or Xerox copies, quarto or A4 size) are required. Rapid publication is aided by careful preparation of text and illustrations and strict adherence to the format and conventions of individual Transactions. Particular attention is drawn to the use of (i) SI units and associated conventions, (ii) IUPAC nomenclature for compounds, and (iii) standard methods of literature citation.

**Administration**—Receipt of a contribution for consideration will be acknowledged immediately by the Editorial Office. The acknowledgement will indicate the paper reference number assigned to the contribution. Authors are particularly asked to quote it on all subsequent correspondence.

**Reprints**—Although 50 reprints are provided free for each paper a further order may be made on the order form sent to the authors with the proofs.

\* Attention is drawn to the Society's Bye-Law, 91.
