PHYSICAL CHEMISTRY

ISSN 0300–9599

Temperature-programmed Desorption of Methanol, Ethanol, Propan-1-ol and Propan-2-ol on Silica–Magnesia Mixed Oxides	H. Noller and G. Ritter	275
Quantum-yield Studies of Group V Hydride Chemiluminescent Reactions	M. E. Fraser, D. H. Stedman and T. M. Dunn	285
CaCl ₂ + KCl + NaCl Molten-salt Mixtures. Experimental and Estimated Enthalpies of Mixing	P. Sem, G. Hatem, J.-P. Bros and M. Gaune-Escard	297
Quasi-elastic Neutron-scattering Studies of the Dynamics of Intercalated Molecules in Charge-deficient Layer Silicates. Part 1.—Temperature Dependence of the Scattering from Water in Ca ²⁺ Exchanged Montmorillonite	J. J. Tuck, P. L. Hall, M. H. B. Hayes, D. K. Ross and C. Poinignon	309
Influence of Adsorbed Water on the Dielectric Response of a Ceramic Material	T. Ramdeen, L. A. Dissado and R. M. Hill	325
The 2p π^* –3d π Interaction in Aromatic Silanes. Fluorescence from the ¹ (2p π , 3d π) Intramolecular Charge-transfer State	H. Shizuka, Y. Sato, Y. Ueki, M. Ishikawa and M. Kumada	341
Canonical Chemical Theories Exemplified by the Methylolation of Urea and Melamine	T. Gebregiorgis and M. Gordon	359
Photochemical and Photophysical Behaviour of Phenylsilanes and Naphthylsilanes	H. Shizuka, H. Obuchi, M. Ishikawa and M. Kumada	383
Adsorption of an Amphoteric Polymer on Barium Sulphate and its Effect on Colloid Stability	P. A. Williams, R. Harrop and I. D. Robb	403
Small-angle Neutron-scattering Studies of Microemulsions Stabilized by Aerosol-OT. Part 2.—Critical Scattering and Phase Stability	C. Toprakcioglu, J. C. Dore, B. H. Robinson, A. Howe and P. Chieux	413
Mechanisms for the Photolysis and Radiolysis of Alkylcobaloximes and Related Compounds. An Electron Spin Resonance Study	D. N. R. Rao and M. C. R. Symons	423
Studies of the Decomposition of Oxirane and of its Addition to Slowly Reacting Mixtures of Hydrogen and Oxygen at 480 °C	R. R. Baldwin, A. Keen and R. W. Walker	435
Hydroxylation Reactions Induced by Near-ultraviolet Photolysis of Aqueous Titanium Dioxide Suspensions	R. W. Matthews	457
Electromotive-force Measurements of Molten Oxide Mixtures. Part 8.—Thermodynamic Properties of Na ₂ O–B ₂ O ₃ Melts	H. Itoh, A. Sasahira, T. Maekawa and T. Yokokawa	473
Single-ion Gibbs Energies, Enthalpies and Entropies of Transfer from Water to Aqueous Methanol based on the (Ph ₄ P ⁺ , Ph ₄ As ⁺) = Ph ₄ B [–] Assumption	M. H. Abraham, T. Hill, H. C. Ling, R. A. Schulz and R. A. C. Watt	489
Electrolytic Conductivity of Multicomponent Polyelectrolyte Solutions	H. Vink	507
Reviews of Books		515

INSTRUCTIONS TO AUTHORS

General Policy—The *Journal of the Chemical Society* is a medium for reporting selected original and significant contributions to new chemical knowledge. Articles which do not advance knowledge (*e.g.* reviews) will not normally be considered for publication in the Journal. Although authors need not be members of the Royal Society of Chemistry it is hoped that they will be.

All contributions are judged in the criteria of (i) originality and quality of scientific content and (ii) appropriateness of the length to content of new science. Thus, papers reporting results which would be routinely predicted or result from application of standard procedures or techniques are unlikely to prove acceptable in the absence of other attributes which themselves make publication desirable.

Although short articles are acceptable, the Society strongly discourages fragmentation of a substantial body of work into a number of short publications. Unnecessary fragmentation will be a valid reason for rejection of manuscripts.

The *Journal* is published in five Transactions: Dalton: Inorganic;
Perkin I: Organic and Bio-organic; Faraday I: Physical;
Perkin II: Physical Organic; Faraday II: Chemical Physics

Authors are requested to indicate, at the time they submit a typescript, the Transactions for which it is intended. Should this seem unsuitable, the Editor will inform the author.

Conditions Governing Acceptance—Contributions which have appeared or have been accepted for publication with essentially the same content in another journal or which incorporate freely available printed work will not be published in the *Journal* except by permission of the Council. This restriction does not apply to results previously published in materially abbreviated form, as a paper presented at a symposium, as a communication to *Chemical Communications*, as a letter to the Editor of other periodicals, or as a patent.

Contributions are accepted by the Society on the understanding that the authors (*a*) have obtained any necessary authority for publication, and (*b*) will, if requested, surrender their copyright to the Society. Authors are solely responsible for the factual accuracy of their contributions.

Since the Society reserves the right to retain all typescripts sent to it, authors are advised to keep copies. When contributions have been submitted for publication the authors are not at liberty, save by permission of the Society, to withdraw or delay them or to publish them elsewhere until after publication by the Society.*

Submission of Articles—Typescripts should be addressed to: The Director of Publications, The Royal Society of Chemistry, Burlington House, London W1V 0BN. Three copies of the typescript (a top copy and two good quality carbon or Xerox copies, quarto or A4 size) are required. Rapid publication is aided by careful preparation of text and illustrations and strict adherence to the format and conventions of individual Transactions. Particular attention is drawn to the use of (i) SI units and associated conventions, (ii) IUPAC nomenclature for compounds, and (iii) standard methods of literature citation.

Administration—Receipt of a contribution for consideration will be acknowledged immediately by the Editorial Office. The acknowledgement will indicate the paper reference number assigned to the contribution. Authors are particularly asked to quote it on all subsequent correspondence.

Reprints—Although 50 reprints are provided free for each paper a further order may be made on the form sent to the author with the proofs.

*Attention is drawn to the Society's Bye-Law, 91.
