

MENDELEEV COMMUNICATIONS

Mendeleev Communications is a prestigious new **primary** journal, produced as a collaborative venture between The Russian Academy of Sciences and The Royal Society of Chemistry. It publishes original papers directly in English, giving the international chemical community rapid access to important new research from Russia and the other states of the former Soviet Union in the shortest possible time.

The journal contains preliminary accounts of novel and significant results of wide general appeal or exceptional specialist interest and covers all branches of chemistry. In format and range of subject matter it closely resembles its 'sister' publication, the popular RSC journal **Chemical Communications**.

Important features include:

- ★ Primary publication in English of original chemistry from Russia and other states of the former USSR
- ★ Two stages of rigorous refereeing – once in Moscow and once in the UK – to maintain the highest possible standards
- ★ Editorial Boards in both Moscow and the UK composed of eminent scientists who will advise on refereeing policy
- ★ Rapid publication – appearance of papers within 12 weeks of receipt in the UK
- ★ High quality production and editing
- ★ News section containing details of forthcoming international conferences and information about The Russian Academy of Sciences
- ★ Essential reading to keep up-to-date with current chemical research
- ★ **Mendeleev Communications** is NOT a translation journal

A selection of recent papers:

Transformation of Androsta-4,9-diene-3,17-dione into 16 α ,17 α -Epoxycorticosterone *Alevtina M. Turuta, Aleksei V. Kamernitskii, Tat'yana M. Fadeeva and Luu Duc Huy*

A Novel Approach to Carbacycline *Genrikh A. Tolstikov, Rinat R. Akhmetvaleev, Vadim M. Zhurba and Mansur S. Miftakhov*

Oxidation of Alkanes by Dioxygen in the Presence of an Iron Complex immobilized on Modified Silica. Chemical Model of Methane Monooxygenase *Vera S. Belova, Alexander M. Khenkin, Victor N. Postnov, Valerii E. Prusakov, Alexander E. Shilov and Marina L. Stepanova*

Cyclic Oligophosphonic Anhydrides *Ivan S. Alfer'ev and Sergey Yu. Bobkov*

Cyclopropanation of Unsaturated Compounds with Diazomethane Generated *in situ*: A New Efficient and Practical Route to Cyclopropane Derivatives *Oleg M. Nefedov, Yuri V. Tomilov, Andrei B. Kostitsyn, Usein M. Dzhemilev and Vladimir A. Dokitchev*

Direct Evidence for Bidentate Character of Potentially Tridentate N,S-Ligands. Molecular Structures of Bis[N-(2-pyridyl)thiosalicylidene- κ S-amino- κ N]-nickel(II) and Bis{1-isopropyl-3-methyl-4-[N-(2-pyridyl)imino- κ N-methyl]pyrazole-5-thiolato- κ S]-copper(II)} *Alexander E. Mistryukov, Igor S. Vasil'chenko, Vladimir S. Sergienko, Alexander L. Nivorozhkin, Stanislav G. Kochin, Mikhail A. Porai-Koshits, Leonid E. Nivorozhkin and Alexander D. Garnovskii*

NEW

Surface Engineering

This title is published in three highly illustrated volumes and covers the latest developments in the subject. It provides a unique combination of the science of coatings and surfaces, the technologies of deposition, surface modification and analysis, and practical applications. The three volumes provide a useful and comprehensive blend of reviews and state-of-the-art papers, written by international experts, and reflect the current status of and likely future advances in surface engineering.

Surface Engineering Volume I: Fundamentals of Coatings

This volume considers principles of coating/substrate design in aqueous and high temperature corrosion, and wear properties, scanning the coatings spectrum from organic, through metallic to ceramic. The emphasis in this volume is on the science and design of coatings and substrate systems rather than on technology.

Hardcover**Approx 385 pages****Due: Autumn 1993****ISBN 0 85186 665 4 (1993)****Price £52.50**

Surface Engineering Volume II: Engineering Applications

Volume II is dedicated to topics concerning the performance of coatings and surface treatments embracing four main areas: the inhibition of wear and fatigue; corrosion control; application of coatings in heat engines and machining; and qualities and properties of coatings.

Hardcover**Approx 350 pages****Due Autumn 1993****ISBN 0 85186 675 1 (1993)****Price £52.50**

Surface Engineering Volume III: Process Technology and Surface Analysis

Volume III has two thrusts as indicated by its title: process technology and surface analysis. Both areas are central to surface engineering and each holds particular promise, not only for improvement in existing types of coatings performance, but also in the design, development and evaluation of totally new coating/substrate systems.

Hardcover**Approx 350 pages****Due: Autumn 1993****ISBN 0 85186 685 9 (1993)****Price £52.50**
