A promotional banner for AIP Applied Physics Reviews. On the left is a small image of the journal cover, which features a diagram of a device structure. The main part of the banner has a blue background with a bright light source on the right. The text 'NEW Special Topic Sections' is prominently displayed in white. Below this, on an orange background, it says 'NOW ONLINE' in yellow, followed by 'Lithium Niobate Properties and Applications: Reviews of Emerging Trends' in white. The AIP Applied Physics Reviews logo is in the bottom right corner.

Erratum: Energy distribution in the photodissociation products of van der Waals molecules: iodine-helium complexes [J. Chem. Phys. 71, 1292 (1979)]

Wayne Sharfin, Kenneth E. Johnson, Lennard Wharton, and Donald H. Levy

The James Franck Institute and the Department of Chemistry, University of Chicago, Chicago, Illinois 60637

The wavelength scale of Fig. 2 is reversed giving the impression that the features due to van der Waals complexes are red-shifted satellites of the uncomplexed I_2 band. In fact, they are blue-shifted satellites. A corrected figure is shown below.
